

Manual of European Environmental Policy

The following pages are a section from the Manual of European Environmental Policy written by the Institute for European Environmental Policy.

The Manual was published by Earthscan/Routledge from 2010 to 2012. It was designed as an on on-line interactive reference work and annual printed versions were also produced.

This section is the text of the Manual as published in 2012. It is therefore important to note the following:

- The contents have not been updated since 2012 and no guarantee is given of the accuracy of the contents given potential subsequent developments.
- The sections include links to external websites (e.g. to legal texts). These links continue to work as long as those links are not broken by those websites.
- The sections also include the original links that enabled interactivity within the published on-line version of the Manual. These links no longer work.

About IEEP

The Institute for European Environmental Policy (IEEP) is a leading centre for the analysis and development of environmental and related policies in Europe.

An independent, not for profit organisation, the Institute has offices in London and Brussels. We offer practical and reliable solutions in a complex legislative environment, based on knowledge of European policy developed over thirty years.

We focus primarily on EU environmental and sustainable development policies, and relevant aspects of other policies such as agriculture, transport, rural and regional development and fisheries. We are also actively engaged in the development of policy at a national level in Europe.

We undertake research and analysis and provide consultancy and information services, working both independently and on commissioned projects. We have regular contact with a full range of policy actors. Our interdisciplinary team of staff includes lawyers and natural and social scientists with experience of working in a wide range of European countries.
