

Manual of European Environmental Policy

The following pages are a section from the Manual of European Environmental Policy written by the Institute for European Environmental Policy.

The Manual was published by Earthscan/Routledge from 2010 to 2012. It was designed as an on-line interactive reference work and annual printed versions were also produced.

This section is the text of the Manual as published in 2012. It is therefore important to note the following:

- The contents have not been updated since 2012 and no guarantee is given of the accuracy of the contents given potential subsequent developments.
- The sections include links to external websites (e.g. to legal texts). These links continue to work as long as those links are not broken by those websites.
- The sections also include the original links that enabled interactivity within the published on-line version of the Manual. These links no longer work.

The Manual should be cited as follows:

Farmer, A.M. (2012) (Editor). Manual of European Environmental Policy. 1043pp. Routledge, London.

Authors

The Manual is the result of work over more than three decades by many people associated with the Institute for European Environmental Policy (IEEP) (see Acknowledgements). Therefore, identifying the authorship of the component chapters of the Manual is not straightforward. In an attempt to best represent this intricate web of authors who have contributed to the text of the Manual, we give here details of three different types of authors: Lead Authors who are currently responsible for the rewriting and updating of a chapter; Contributing Authors who have (sometimes heavily) contributed to the text and research of a chapter; and Previous Authors who have contributed (often fundamentally) to the writing and research of the Manual in previous years and whose input, in many cases, is still to be found in the current text of the Manual.

Sirini Withana is the Lead Author of *Policy Framework*. Sirini is a Policy Analyst working in the Institute's Environmental Governance Programme. Her work focuses on EU institutional developments, overarching EU strategies such as the Sustainable Development Strategy and the Sixth Environmental Action Programme, the external dimension of EU policies and the future orientations of EU environmental policy. Sirini joined the IEEP London office in August 2007. She has a Master's degree in International and European Politics from the University of Edinburgh and a first degree in economics from the University of Cape Town. Before joining the Institute, she worked for the Environment Agency for England and Wales as part of their EU and International Relations team.

Andrew Farmer is the Lead Author of *Air Quality; Industrial Pollution; and Water and Marine*. Andrew is a Senior Fellow and Head of the Institute's Industry, Waste and Water Programme, where he specializes in EU legislation in relation to water and air pollution, and pollution control. A natural science graduate from Oxford University, Andrew has a PhD from the University of St Andrews. Before joining IEEP in 1997, Andrew worked for English Nature as its atmospheric pollution specialist and sustainable development coordinator and, before that, undertook research at the Universities of Florida and Wisconsin, USA and Imperial College, University of London. He is the author of a wide range of publications including the books *Managing Environmental Pollution* (Routledge) and *A Handbook of Environmental Protection and Enforcement* (Earthscan).

Pernille Schiellerup is the Lead Author of *Climate Change*. Pernille is a Senior Policy Analyst and Head of the Institute's Climate Change and Energy Programme. Her specialist subjects include climate change mitigation in the built environment; dynamics of energy consumption; stakeholder engagement and environmental governance; and social forestry. Pernille joined IEEP in August 2009. She previously worked at the London Climate Change Agency, the Environmental Change Institute at University of Oxford, and University College London. She has extensive experience in the development, implementation and evaluation of strategies for climate change mitigation in the built environment at city, national and EU levels.

Catherine Bowyer is the Lead Author of *Waste and Resource Use*. Catherine is a Senior Policy Analyst in the Institute's Industry, Waste and Water Programme and Climate and Energy Programme. Catherine joined IEEP in 2002, and heads IEEP's waste team providing analysis of the development of EU waste, product and natural resource use policy including soil protection. She has worked in detail on different aspects of EU waste policy including

waste shipment, appropriate target setting, the role of the recycling Directives, the development of the Directive on waste and supporting the evolution of the Thematic Strategies on waste prevention and recycling and the Thematic Strategy on natural resource use.

Peter Hjerp is the Lead Author of *Chemicals*. Peter is a Senior Policy Analyst in the Institute's Environmental Governance Programme. He is a trained environmental chemist as well as a specialist in environmental policy. Peter's work covers a broad range of sectors but tend to focus on environmental assessments, evaluations, governance issues and the implementation of EU Directives. He represents IEEP as a member of the Chemicals Stakeholder Forum, which provides advice on chemicals to the UK Government. Peter holds Master's degrees from both Helsinki University of Technology and the London School of Economics and Political Science.

Graham Tucker is the Lead Author of *Biodiversity*. Graham is a Senior Fellow and Head of the Institute's Biodiversity Programme. He has an MSc and PhD in ecology and over 23 years professional experience in biodiversity conservation in Europe. He was responsible for developing BirdLife International's European Habitat Conservation Programme as well as acting as lead author of *Birds in Europe: their conservation status and Habitats for Birds in Europe: a conservation strategy for the wider environment*. He then moved into consultancy undertaking a wide range of biodiversity conservation related studies and practical work in Europe, including scientific reviews, conservation strategy and action plan development, impact assessments and capacity building and training. His current interests focus on incorporating ecological science in policy development, particularly relating to land use and climate change issues.

Victoria Cherrier is the Lead Author of *Noise*. Victoria is a Policy Analyst and joined the Institute's Industry, Waste and Water Programme at IEEP in January 2010 after having completed a three-month internship focusing on the Manual. After studying law and history of art at La Sorbonne, she came to the United Kingdom and has recently completed a Master in Environmental Law and Policy (LLM) at University College London.

Kristof Geeraerts is the Lead Author of *Supporting Policy*. Kristof is a Policy Analyst in the Institute's Environmental Governance Programme. His special subjects are strategic EU developments, environmental governance, and the transposition and implementation of EU Directives and multilateral environmental agreements including the Environmental Liability Directive, the Environmental Crime Directive, the Biological Diversity Convention and the Montreal Protocol on ozone-depleting substances. Kristof joined IEEP in December 2006 and is a political and environmental scientist by training. Before joining IEEP, he was a research assistant at the Department of Political Sciences of the University of Antwerp where he conducted policy-oriented research on the role the Flemish region plays within the European multi-level environmental governance system.

Keti Medarova-Bergstrom is the Lead Author of *Funding Instruments*. Keti is a Policy Analyst in the Institute's Environmental Governance Programme and is a specialist in EU cohesion policy and the EU budget. Keti joined IEEP in November 2009 and prior to this she led the programme for sustainable EU funds at CEE Bankwatch Network and Friends of the Earth Europe and worked on research projects for the United Nations Development programme and the EU within the Centre for Environmental Policy and Law in Budapest. She is currently a PhD candidate at the Central European University, where she also obtained

her Master's degree in environmental sciences and policy. Her thesis explores strategies and tools for environmental policy integration in the programming and implementation of EU Structural Funds in Bulgaria.

Emma Watkins is a Contributing Author of *Waste and Resource Use*. Emma is a Policy Analyst working in the Institute's Industry, Waste and Water Programme. She joined the institute in May 2007 and her research includes: the coherence of EU waste legislation, in particular the EU recycling Directives; preparation of the general implementation report on EU waste legislation for 2004-2006; a study to support the review of the Thematic Strategy on the Prevention and Recycling of Waste; and a study on inspection requirements for waste shipments. She also authors the EU Bytes section of the Institute of Environmental Management and Assessment's (IEMA) publication the environmentalist. Her previous experience includes working for the Brussels offices of two UK regions (the East of England and London), where she monitored EU environment, transport and energy policy and funding of relevance to local authorities.

Kaley Hart is a Contributing Author of *Funding Instruments and Sectoral Policies* - she is responsible for the section on Agriculture. Kaley is Joint Head of the Institute's Agriculture and Land Management Programme and has 13 years experience of working on United Kingdom and EU agricultural, rural development and environmental policy. She joined IEEP in October 2007, after six years working for the Countryside Agency and Natural England, statutory advisers to Government on environmental issues. Her particular areas of interest and expertise include agri-environment policy development and evaluation and the integration of environmental considerations into European and national agricultural and rural development policies. Recent work includes: the pan-European study on the provision of public goods through agriculture; an evaluation of the economic, social and environmental impacts of modulation, assessing the environmental benefits of EU set-aside and work on the development of an Agri-Environment scheme in Serbia and Macedonia.

Sonja Gantioler is a Contributing Author of *Biodiversity* - she is responsible for the section on GMOs - and *Sectoral Policies* - she is responsible for the section on Forestry. Sonja is a Policy Analyst and joined IEEP in April 2008, where she works in the Institute's Biodiversity Programme. Sonja's work is focused on aspects of EU biodiversity policies, in particular on the costs and benefits of the Natura 2000 network, and the assessment and development of biodiversity and ecosystem services indicators. She also contributes to work on other policy areas relating to nature and biodiversity conservation, including forestry policy. She holds a Master's degree in ecology - with specialist knowledge in forest ecology, forestry and environmental economics - from Vienna University, Vienna University of Economics and Business and Technical University Munich. Before joining IEEP, she worked as an analyst for a rating agency in the field of sustainable investment, where she was leading the evaluation of the environmental and social performance of 45 countries and of companies belonging to the Transport and Logistics sector.

Jane Desbarats is a Contributing Author of *Sectoral Policies* - she is responsible for the section on Transport. Jane is a Senior Policy Analyst with the Institute's Climate Change and Energy Programme. Jane's work at IEEP focuses primarily on the development of policy aimed at encouraging the mitigation of greenhouse gas policies in relation to a number of sectors including transport and energy. Her key areas of expertise include emissions trading, offsets and monitoring, reporting and verification.

Ben Allen is a Contributing Author to *Climate Change*. He has eight years experience of working on agriculture and land management policy issues including bio-energy. He joined the IEEP Agriculture and Land Management team in September 2010, having spent the previous five years working as a policy adviser on the Common Agricultural Policy (CAP) as well as bio-energy policy issues for Natural England, the UK government's statutory adviser on the natural environment. Ben has also worked on secondment for the National Trust as a Senior Officer on sustainable land use and management policy, developing their portfolio of work on the CAP and looking at the future of land and water management in the UK. He has a degree in Environmental Biology and a PhD in the field of Land Use and Spatial Ecology.

Evelyn Underwood is a Contributing Author to *Biodiversity*. She has eight years experience of project management, communications and research in international networks on the environmental risk assessment of genetically modified crops, and on global sustainability issues. Evelyn has also worked in environmental education, NGO campaigning, and ecotourism in Switzerland, Ecuador and Wales. She has a degree in Environmental Biology and a Masters in Agriculture, Environment and Development.

Stephanie Newman is a Contributing Author to *Sectoral Policies* she is responsible for the section on Fisheries. Stephanie joined IEEP as a policy analyst in the Fisheries and Marine Programme in January 2010. Stephanie has worked on a number of projects related to the reform of the Common Fisheries Policy and European fisheries subsidies. She also plays a key communications role within IEEP. She holds an undergraduate degree in Environment, Ecology and Economics and an MSc in Marine Environmental Management both from the University of York. Prior to working at IEEP Stephanie spent some time working at the Department of Fisheries and Oceans in Newfoundland, Canada, studying the implementation of ecosystem based management in Canadian fisheries policy.
