

A sustainable use of biomass in Europe?

EU bioenergy and its use of biomass have several impacts on the biophysical system. This report provides a meta-review of the use of biomass within biophysical limits in the context of the EU Green Deal.

Blog | A rookie's view of COP26

Michael Nicholson, Head of UK Environmental Policy at IEEP, shares his personal views as IEEP delegate at the Glasgow summit. [Read the blog](#)

Agriculture left out of the Global Methane Pledge at COP26

Although it accounts for most of the global methane emissions, the agriculture sector got little attention in the Global Methane Pledge at COP26. [Read our reaction](#)

Carbon inequality in 2030: Per capita consumption emissions and the 1.5°C goal

The carbon footprints of the richest 1 per cent of people on Earth is set to be 30 times greater than the level compatible with the 1.5°C goal of the Paris Agreement in 2030. [Read the briefing](#)

Review of EU FTAs Trade and Sustainable Development Chapters

Despite the Green Deal's promise to improve the mainstreaming of social and environmental sustainability concerns in EU FTAs, EU trade is not yet making a positive contribution to sustainable development. [Read the statement](#)

Climate ambition and justice: A compass for the CBAM design

The EU CBAM proposal, as it currently stands, is legally sound but requires to be improved through a more rapid phase-out of free allowances and the mobilisation of revenues for climate justice. [Read the policy brief](#)

Think Sustainable Europe

The idea generator behind the Think2030 platform, [Think Sustainable Europe](#) is a pan-European network of sustainability think tanks, led by IEEP, and including BC3, the Ecologic Institute, the Green Tank, IDDRI, IISD, SEI, WiseEuropa and TMG. The network aims to provide policymakers across the continent with sound, science-based analysis and recommendations.
