Horizon Europe budget negotiation to negatively impact EU research agenda

IEEP is convening discussions with a group of stakeholders on agricultural R&I, with a focus on Horizon Europe. In light of the proposed budget cuts by the Council, stakeholders voice their support for appropriate funding for vital research, in line with the Parliament's and Commission's budget position.

Biodiversity footprints in policy and decision-making

Methods to better integrate biodiversity considerations into public and private decision-making are key to achieving the transformative change needed to halt and reverse biodiversity loss. As highlighted under the EU Biodiversity Strategy to 2030, these include effective footprint methods. [Read our report](#)

Towards a legislative framework for sustainable food systems

The evidence shows that European food systems are not sustainable. The question of how best to address this is now gathering momentum, with the expectation of a major proposal being tabled by the European Commission in 2023. [Learn more here](#)

Building blocks for food system resilience in Europe

Building a sustainable and fair food system, stretching from primary production to consumption in the home, is one of the greatest challenges. Resilience and preparedness for pandemics made it to the centre stage of politics, including the current Slovenian Council presidency. [Read our response](#)

Think Sustainable Europe

The idea generator behind the Think2030 platform, [Think Sustainable Europe](#) is IEEP's membership network of sustainability think tanks, including BC3, Ecologic Institute, the Green Tank, IDDRI, IISD, SEI, WiseEuropa and TMG. The network aims to provide policymakers across the continent with sound, science-based analysis and recommendations.
