What if a sustainable CAP was relying on a more gender-balanced decision-making?

Science is unequivocal about the urgent need for a radical change in the way we produce and consume food. Yet the most influencing policy behind this is criticized for not stimulating and encouraging the necessary transition towards sustainable practices in the sector.

There are many economic, cultural, and structural factors explaining that attempt to maintain status quo over necessary changes, but what if and how gender in CAP decision-making was also playing a role?

Think Sustainable Europe

The idea generator behind the Think2030 platform, [Think Sustainable Europe](#) is IEEP's membership network of sustainability think tanks, including BC3, Ecologic Institute, the Green Tank, IDDRI, IISD, SEI, WiseEuropa and TMG. The network aims to provide policymakers across the continent with sound, science-based analysis and recommendations.
