

Science-based solutions for European environmental policy

IEEP is the leading Brussels-based think tank dedicated to EU environmental policy research. We provide strategic intelligence on how Europe can turn environmental policy into a driver of competitiveness, resilience, and innovation. We connect zero-pollution, nature, and climate goals with jobs, investment, and social well-being, helping governments and businesses make sustainability work in practice. Our work equips decision-makers with clear evidence and actionable insights to navigate Europe's transition with confidence.

About IEEP Partnership

Through this partnership, IEEP creates a **trustworthy** and **interactive** space for civil society organisations, academic entities, public institutions, industries, and foundations that share our vision for sustainable development and place rigorous, impactful research at the core of their mission. We aim to build connections among diverse actors, fostering mutual understanding and collaboration towards a more sustainable future, even and perhaps especially on contentious issues.

Through this partnership, organisations gain immediate access to:

Independent expertise

We are renowned for our unbiased, high-quality research.

Policy impact

We work to shape environmental policies through science-based recommendations.

Collaborative network

We connect diverse organisations to reflect on our recommendations and ensure their viability for policymaking and implementation.

The IEEP Partnership provides a long-term collaboration between your organisation and the leading EU environmental think tank.

Partners will benefit from...

Access to expertise

Partners gain privileged access to IEEP's interdisciplinary team of policy analysts and environmental scientists through bilateral exchanges and participation in tailored policy dialogues.

Partners are also invited to participate to **Think Sustainable Europe (TSE)**, a pan-European network of sustainability think tanks with 17 members in 16 EU Member States and the UK. TSE connects national and European experts to provide policymakers and broader audiences with policy solutions to achieve concrete outcomes in our thematic priorities: climate & energy, food, land use & agriculture, industrial policy, circular economy and trade issues

Through access to IEEP and TSE experts, partners get to:

- Receive informed opinion and guidance on EU environmental policy files, sectoral strategies, and environmental governance challenges across Europe.
- Gain early insights into emerging EU legislative processes.
- Access a geographically and thematically diverse network of experts throughout Europe.
- Engage directly with European policymakers and national governments of our members.
- Contribute to joint policy briefs and Co-design projects.

Participation in Think2030

Partners are also integrated into **Think2030**, IEEP's flagship conference, organised in conjunction with the rotating Presidencies of the Council of the EU. Think2030 brings together decision-makers, policy experts, business leaders, and civil society to advance science-based solutions for the transition towards a sustainable future. As part of Think2030, partners get to:

- Participate in high-visibility, country-level conferences on priority topics.
- Engage with EU and national thought leaders.
- Benefit from speaking and co-branding opportunities as appropriate.

Commission research output(s)

Partners may mobilise IEEP expertise and commission a specific research work on a relevant topic. This work can typically entail:

- Background research on specific topic; related policy mapping at EU or national level; problem identification tailored to partner's priorities.
- Development of actionable, policy-relevant recommendations.
- Facilitation of internal workshops to present the findings.

Joining IEEP as a Partner means becoming part of Europe's leading community of environmental thinkers. It is more than a sponsorship – it is a strategic alliance built on evidence, credibility, and shared purpose.
